

Researcher			Institution	Project Title	Amount Awarded
Engelbrecht	Anna-Mart	Dr	University of Stellenbosch	Therapeutic nutrient starvation and <i>breast cancer</i> . The effect of increased basal autophagy on doxorubicin treatment regimes.	R120 000-00
Hendricks	Denver	Dr	UCT	Insulin receptor isoforms as therapeutic targets in <i>oesophageal cancer</i> .	R150 000-00
Joubert	Annie	Prof	University of Pretoria	<i>In silico</i> analysis, synthesis and <i>in vitro</i> evaluation of novel anticancer agents.	R100 000-00
Kramvis	Anna	Prof	WITS	Functional characterization of pre-S1/pre-S2 deletion mutants obtained from Southern African <i>hepatocellular carcinoma</i> patients.	R100 000-00
Leaner	Virna	Dr	UCT	Identification of nuclear import inhibitors with anti-cancer activity.	R190 000-00
Naidu	Gita	Dr	WITS	Infectious complications in the South African Black Child with Cancer	R100 000-00
Passmore	Jo-Ann	Dr	UCT	Impact of genital inflammation, HIV co-infection and <i>Human Papillomavirus (HPV)</i> -specific cellular immunity on HPV burden in the female genital tract. Inflammation and HIV co-infection as co-factors for cervical disease progression.	R150 000-00
Penny	Clement	Dr	WITS	Isolation and Characterization of <i>Colon Cancer</i> Stem Cells, the Effects of Epigenetic Modulation on Pluripotent Markers.	R150 000-00
Prince	Sharon	Dr	UCT	Identification of novel therapeutic strategies to treat cancer by targeting the cell cycle regulators, TBX2 and TBX3.	R190 000-00
Shires	Karen	Dr	UCT	Cancer/Testis antigen expression in <i>Multiple Myeloma</i>	R100 000-00
Sommer	Paula	Dr	University of KwaZulu-Natal	Epigenetic silencing of the glucocorticoid receptor in <i>small cell lung cancer</i> .	R95 000-00
Zaahl	Monique	Dr	University of Stellenbosch	Molecular characterisation of the promoter region of genes of the iron metabolism pathway in <i>oesophageal cancer</i> patients.	R130 000-00
