

New Type A Research Grants for 2019 funding

Researcher			Institution	Project Title	Amount Awarded 1 April 2019 – 31 March 2022
Candy	Geoffrey	Prof	University of the Witwatersrand	<i>Discovery of novel targets in pancreatic cancer by investigating aberrant signaling pathways</i>	R201 912.00
Engelbrecht	Anna-Mart	Prof	Stellenbosch University	<i>Immunogenic fingerprinting in the new era for personalized medicine: Serum amyloid A and macrophages in the tumour-microenvironment</i>	R845 007.65
Kramvis	Anna	Prof	University of the Witwatersrand	<i>Physical properties of core and HBeAg/precursors and host-pathogen interactions leading to development of hepatocellular carcinoma</i>	R697 825.50
Kruger	Cherie	Dr	University of Johannesburg	<i>“The In Vitro Possible Photodiagnosis and Photodynamic Therapy Treatment of Colon Cancer”</i>	R171 000.00
Leaner	Virna	Prof	University of Cape Town	<i>Identification of novel cancer biomarkers with diagnostic and therapeutic potential for cervical and oesophageal cancers using a targeted proteomic approach</i>	R900 000.00
Louw	Ann	Prof	Stellenbosch University	<i>Molecular mechanisms of breast cancer risk reduction by SM6Met, a well characterized Cyclopi extract</i>	R428 165.31
Sandrine	Lecour	Prof	University of Cape Town	<i>HDL and anthracycline-induced cardiotoxicity</i>	R900 000.00
Van der Merwe	Haynes	Dr	Tygerberg Hosp. & Stellenbosch University	<i>ImmunoVACCS</i>	R233 287.50

The maximum amount over 3 years granted for funding is currently R1.2 million per applicant. CANSA will fund 75% of grants as per the above table. Grant holders' Institutions will augment the remaining 25% for a period of 3 years.
